---	---	---

Summary

Product Manager with a full-stack and Developer Relations background, specializing in AI-driven platforms and product growth. [REDACTED] manage a market intelligence platform with 20K MAU, [REDACTED] and reduced integration onboarding from 6 to 3 weeks. Launched a GPT-4.1 RAG chatbot with [REDACTED] enterprise organizations requesting early access pre-GA. Experience with multi-agent systems, LLM governance, stakeholder alignment across global organizations, and 0-to-1 product development.

Select Experience

Global Product Manager II

Jan 2024 - Present

Mastercard Insights & Intelligence [REDACTED] United States (Remote)

- **GenAI:** Led 0-to-1 iterative development of MBI's first **agentic architecture GPT-4.1 / RAG chatbot** driving in-flight recommendations with [REDACTED] enterprise orgs requesting early access pre-GA. Actionable insights from report repository. Served as internal and customer-facing demo lead, strengthening sales enablement ahead of launch. Established LLM evaluation pipelines and human-in-the-loop testing for production governance.
- **Platform Scale:** Integrated [REDACTED] products (**50%+ portfolio increase**) on a B2B intelligence platform serving **20K MAU** and enabling multi-million dollar annual revenue. Scaled revenue [REDACTED] with minimal cost increase [REDACTED] by leveraging platform-native tools and streamlined AI prototyping to eliminate cross-functional bottlenecks. Tracked performance via Excel, Mixpanel, and Drupal.
- **Platform Onboarding:** Authored 130-page platform & process guide; reduced integration partner onboarding time by **40% (6 to 3 weeks)** for [REDACTED] global teams. Converted a feature request into a reusable bulk content editing capability, creating leverage across multiple products.
- **User Satisfaction & NPS:** Orchestrated platform redesign delivering [REDACTED] **search engagement** and [REDACTED] Independently defined and documented the unauthenticated experience post-launch discussions, unblocking downstream decisions. Implemented semantic search via vector embeddings.
- **Growth & Activation:** Exceeded activation targets by [REDACTED] driving [REDACTED] in user opt-ins with experimental frameworks. Resolved cross-team UTM ownership and usage ambiguity by defining a scalable strategy adopted org-wide. Drove alignment by replacing passive docs with live demos and webinars to accelerate time-to-value.
- **Leadership:** Coordinated OKR alignment across global hubs (Dublin, London, Singapore). Assumed expanded ownership across time zones earning recognition for urgency, reliability, and confidence.

Automation Engineer I (BizOps/DevOps)

Jan 2022 - Jan 2024

Mastercard [REDACTED] United States

- Optimized automation pipelines for 100+ enterprise applications, reducing deployment time by **~50%**.
- Standardized documentation and aligned requirements across global teams, reducing cross-functional alignment time by **42%**.

Other Experience

Software Engineer, Internship, Visa, Austin, TX. May 2021 - Aug 2021. Built multilingual React SPA deployed across 1,600+ partner sites.

Developer Relations Engineer, Internship, Google, New York, NY. Jun 2020 - Aug 2020. Contributed to open-source Python automation (Synthtool); UX research for developer tools.

Beta Tester / Product Research Participant: Atlassian, Dynamo AI, Canva, and others , power-user feedback loops bridging product and customer across enterprise SaaS tools. 2022–Present.

Open Source Contributor, Notion App Modloader. **#3 top contributor;** managed Discord support channels and community feedback loops; technical documentation and issue triage.

Founding Product: Nexus Valley Solutions, United States. Oct 2018 - Mar 2019. EdTech startup; robotics curriculum. tecBridge Strategic Business Plan Award 2018.

Open Source Project: TRIAGE Intelligent Budgeting , action-oriented rolling-forward budget methodology. github.com/[REDACTED]
