EXPERIENCE

Product Manager II | Insights & Intelligence (Financial Services)

Jan 2024 - Present | Remote

- Pioneering multi-agent chatbot:** Led development of an enterprise RAG-based chatbot using multi-agent architecture from ideation to global launch. Improved data-retrieval accuracy and traceability by 30%. Implemented prompt sanitization, PII redaction, and bias monitoring to meet rigorous governance standards. Launched across multiple international markets including the Nordics, LATAM, and EMEA.
- Diverse platform products:** Led integration of over 10 products, increasing platform portfolio by 50%+. Drive key initiatives on a global market intelligence platform supporting 30+ market research, data, and analytics products for financial institutions and merchants. Platform enables multi-million dollar annual revenue streams.
- Search and Content Transformation:** Search redesign and repositioning leading to resulting in a +106% increase in search engagement. Launched AI-assisted editorial and semantic-search tools using vector embeddings to enhance content quality and user discovery.
- Operational Excellence:** Developed comprehensive product management frameworks for business intelligence units, defining workflows, content governance (RACI), and technical walkthroughs for cross-functional alignment.
- Monthly NPS increased to 79 (+18pp MoM) following platform UX and homepage improvements, indicating stronger discoverability and clarity. Streamlined partner onboarding by 40% via self-service documentation and automated analytics dashboards.
- Established semi-automated evaluation pipelines for LLM benchmarking and human-in-the-loop testing to ensure model quality and ethical policy alignment.
- Collaboration & travel across global tech hubs (Europe, Asia, and North America) to align OKRs, roadmapping and regional requirements.

DevOps Engineer I | FinTech Enterprise

Jan 2022 - Jan 2024 | Remote/Hybrid, New York, NY

- Optimized automation pipelines for 100+ applications, reducing deployment time by ~50%. Facilitated agile delivery by standardizing documentation and aligning stakeholder requirements, reducing cross-team alignment time by 42%.

Earlier Experience

Visa (Software Engineer) • Google (Developer Relations Engineer) • Nexus Valley Solutions (Product)

Built multilingual React applications deployed across 1,600+ partner sites. Contributed to open-source Python automation tooling and conducted developer UX research. Led technical initiatives for educational technology startups and managed university web applications (100K+ monthly visits) involving SQL database migrations and Python automation.

"She is an excellent technical communicator [...] Alexa was great to have as a team member and I would happily recommend her for any position."
— Senior Developer Advocate (via LinkedIn)

EDUCATION

University of Scranton — B.S. Computer Information Systems, Business Analytics Focus | Magna Cum Laude

SKILLS

Product

User Analytics • Market Research • Cross-Cultural Management • Data Analysis • UX/UI • Prioritization • MVP Development • Positioning • Emerging Tech • OKRs • Stakeholder Management

Technical

Python • PostgreSQL • LLMs • Agentic AI • RAG • OpenAI • Azure AI • Vector Databases • React • Elasticsearch • GCP • APIs • Git • Figma • Mixpanel

Business

Agentic Commerce • Global Collaboration • Technical Communication • Data-Driven Decisions • Cross-functional Leadership • Product Strategy • Go-to-Market Strategy • Agile Delivery

ADDITIONAL

Speaking: Featured speaker on "AI Product Prototyping" and "Early Career Roadmapping" at industry conferences (BCCC, INFORMS).
Advisory: Strategic Advisor for culinary and service-based agencies—focusing on operational streamlining and client strategy.
User Research: Active beta tester for SaaS and AI products (Atlassian, Canva, Oura, etc.).
